Name: Harsh Pandya
SRN: PES1UG24CS182
Problem statement: 52 - Community Tool & Equipment Library

Use Case: UC-03 - Check Out Equipment
Primary Actors: Community Member, Library Custodian

1. Preconditions

1. The community member has a valid library membership.
2. The equipment is available or has been reserved by the community member.
3. The equipment's required security deposit can be calculated.
4. The community member has an accepted payment method.

2. Postconditions

1. The equipment is marked as **Borrowed**.
2. The checkout date and expected return date are recorded.
3. The required security deposit is recorded/processed.
4. The loan is associated with the community member.

3. Main Success Scenario

1. The community member selects the equipment they want to check out.
2. The library custodian verifies the member and equipment details.
3. The system checks that the equipment is available or reserved for the member.
4. The system calculates the required security deposit and applicable loan duration.
5. The system displays the deposit amount and expected return date.
6. The community member confirms the checkout.
7. The system processes the required deposit through the payment service.
8. The system records the checkout date and expected return date.
9. The system changes the equipment status to **Borrowed**.
10. The system confirms that the equipment has been successfully checked out.

4. Alternate Flow

A1. Security Deposit Payment Fails

1. At **Step 7**, the payment service declines or fails to process the security deposit.
2. The system displays a message indicating that the payment could not be processed.
3. The community member is prompted to retry the payment or use another payment method.
4. If the payment succeeds, the process continues from **Step 8**.
5. If the payment cannot be completed, the checkout is cancelled and the equipment remains **Available/Reserved**.
